

WEEK 1: ASSIGNMENT 1

1. Which of the following is NOT an example of a descriptive analytics tool used in HR?
 - a) Mean and standard deviation
 - b) Counts and ratios
 - c) **Decision trees and random forests**
 - d) Mode and median
2. HR analytics differs from HRMIS primarily because HR analytics has the potential to connect HR processes and decisions with _____.
 - a) Employee satisfaction scores only
 - b) Regulatory compliance requirements
 - c) Payroll and compensation structures
 - d) **Organization performance**
3. According to the criteria for good HR activity metrics, every metric must explicitly describe what it does NOT include. This rule primarily ensures _____.
 - a) That metrics are visually appealing in dashboards
 - b) **Clarity and prevention of misinterpretation of calculations**
 - c) That metrics are aligned with competitor benchmarks
 - d) That only positive outcomes are measured and reported
4. According to the criteria for good HR activity metrics, an organization should capture and track all possible metrics, even those not currently being used, to build a comprehensive data history.
 - a) True
 - b) **False**
5. A good HR problem definition must cover three elements. Which of the following correctly lists all three?
 - a) **A statement of what, a statement of why, and a desired state or outcome**
 - b) A statement of who, a statement of when, and a budget estimate
 - c) A statement of the problem, a timeline, and a team assignment
 - d) A cost-benefit analysis, a risk assessment, and an expected output
6. The overconfidence trap is described as particularly dangerous because it prevents analysts and decision makers from _____.
 - a) Using advanced statistical tools
 - b) **Questioning their methods, motivation, and the way they communicate findings**
 - c) Collaborating with HR business partners
 - d) Collecting sufficient sample data for analysis

7. Which of the following best describes the 'overfitting trap' in HR analytics?
- a) The analyst uses too few variables to build a reliable model
 - b) The analyst collects more data than is needed for the analysis
 - c) The visualization uses too many chart types, causing confusion
 - d) **The model performs well on training data but poorly on new real-world data**
8. In the stakeholder engagement framework for HR analytics, data owners, technology owners, and subject matter experts are classified as _____.
- a) Stakeholders served
 - b) **Stakeholders depended upon**
 - c) Stakeholders impacted
 - d) Stakeholders managed
9. Which of the following correctly lists the four components of the 'Six Skills for Success' category called 'Business Acumen'?
- a) Data awareness, Statistical methods, Visualization, Writing
 - b) Problem definition, Project management, Change management, Stakeholder management
 - c) **Financial literacy, Political astuteness, Internal awareness, External awareness**
 - d) HR sub-functions, HR interdependencies, Privacy, Ethics
10. Which of the following statements best describes the relationship between KPIs and HR metrics?
- a) KPIs and HR metrics are completely unrelated measurement tools
 - b) **HR metrics are a broader category, and every KPI is a metric**
 - c) KPIs replace traditional HR metrics in modern organizations
 - d) HR metrics only apply to recruitment; KPIs apply to all functions

Answers:

- 1. c)
- 2. d)
- 3. b)
- 4. b)
- 5. a)
- 6. b)
- 7. d)
- 8. b)
- 9. c)
- 10. b)
