Human Resource Analytics

Lecture 24

Selection Analytics 2

Dr. Abhishek Singh

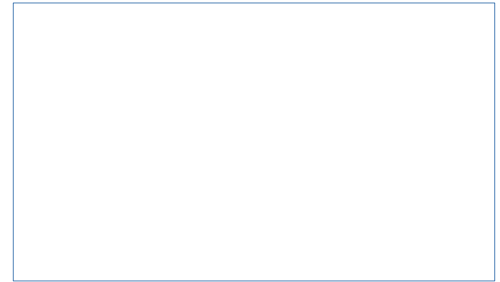

Faculty-Human Resource Management

XLRI-Jamshedpur

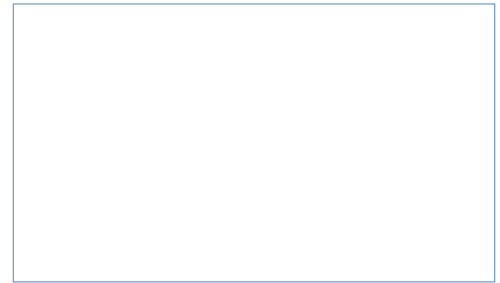

Content

- Consequences of cut score
- Quality of hire
- Cost per join
- Outcome of selection process

Consequences of cut scores

Successful	False Negative	True Positives
Unsuccessful	True Negatives	False Positives
	No hire	Hire

Outcome of selection process

For example – 100 candidates are selected

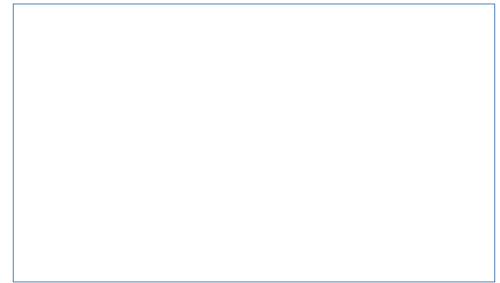

Quality of Hire

$$\text{Quality of Hire} = (\text{PR} + \text{HP} + \text{HR}) / 3$$

PR = Average performance review rating of new hires

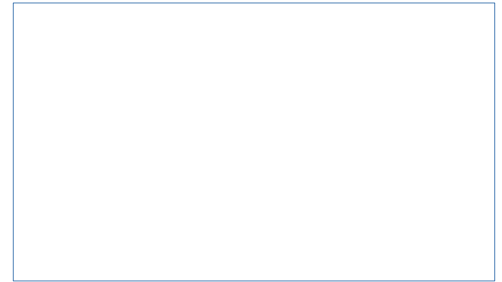

HP = Percentage of new hires reaching acceptable productivity levels within the prescribed time period

HR = Percentage of new hire retained after one year

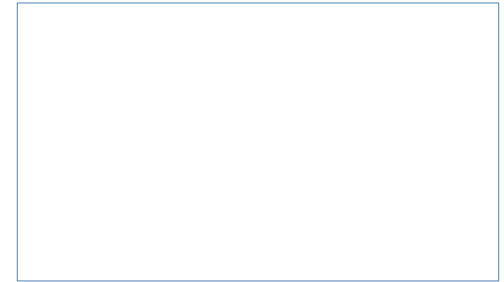

Cost per joinee

Year	Cost per Joinee	Joinees (Number)	Total Cost

Outcome of selection process

Actual performance of potential candidate	Good	A	B
	Poor	C	D
		Selected	Not selected

Thank You
