Human Resource Analytics

Lecture 26

Selection Analytics IV

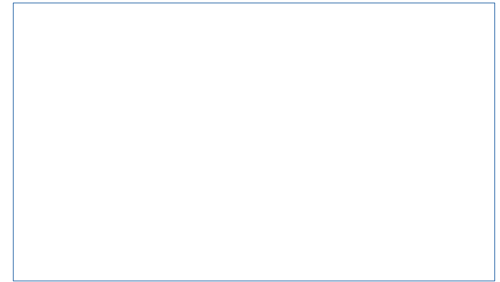

Dr. Abhishek Singh

Faculty-Human Resource Management
XLRI-Jamshedpur

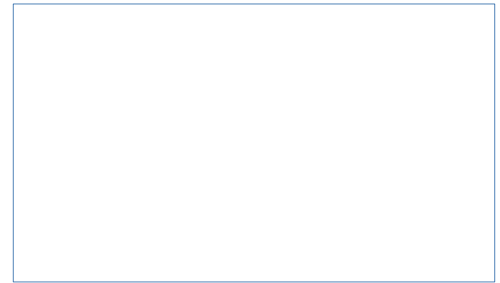

Content

- Use of biodata in selection analytics
- Verifiable data
- Non verifiable data
- Accuracy of prediction
- Use of technology in assessment
- Parameter to consider

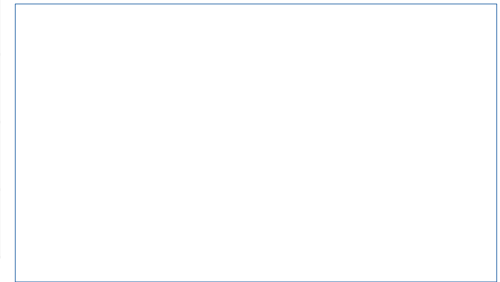

Use of biodata in selection analytics

- ☐ Verifiable data
- ☐ Non verifiable data

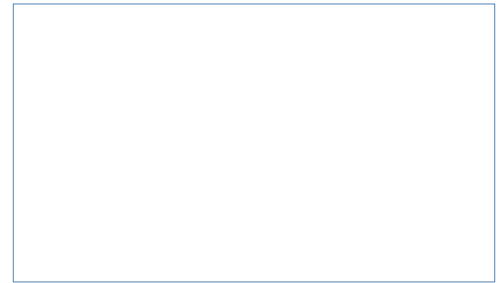

Verifiable data

Age	
Work experience	
No. of jobs held in last five years	
Time in one's previous position	
Marital status	
Living arrangements (Rent, home, and living with parents)	
Personality test	
Performance rating of last five years	
Education background	
Family background	

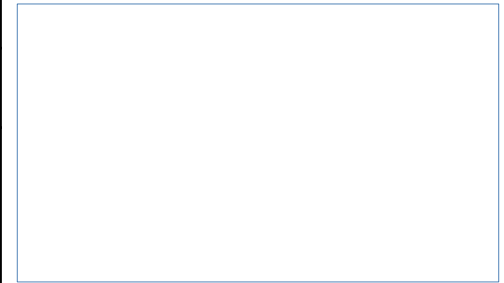

Non verifiable data

Preference	
Future expectations	
Self description of ability	

Accuracy of prediction

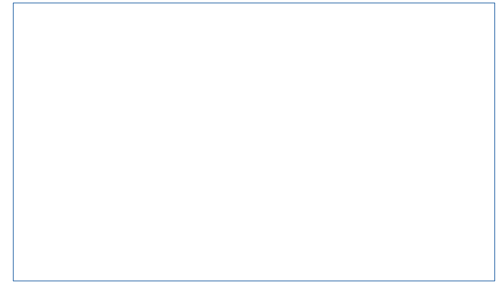

Actual Performance	High	Error in predictions (B)	Correct protections (A)
	Low	Correct protections (C)	Error in predictions (D)
		Low	High
		Predicted Performance	

Use of technology in assessment

Parameter to consider

- ❖ Speed of hire
- ❖ Applicant reaction
- ❖ Size, diversity and applicant pool
- ❖ Accuracy of hiring decisions
- ❖ Cost of hire
- ❖ Impact on employer brand
- ❖ Cheating
- ❖ Privacy concerns

Thank you
