Sheet 19

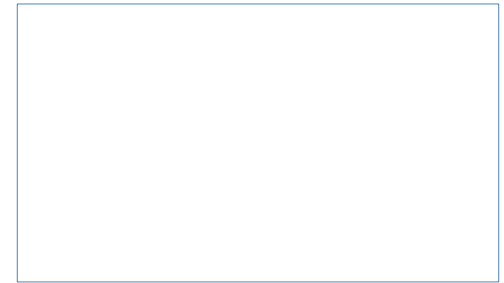

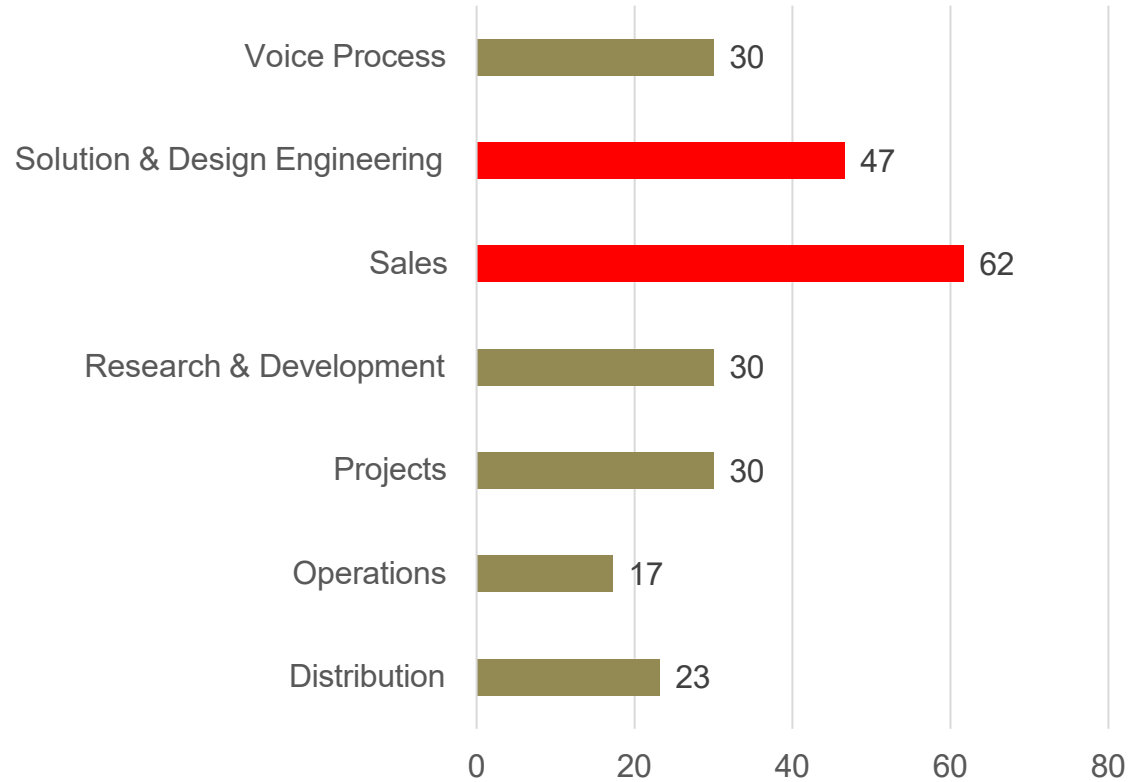

Source of Hire and Diversity Hire

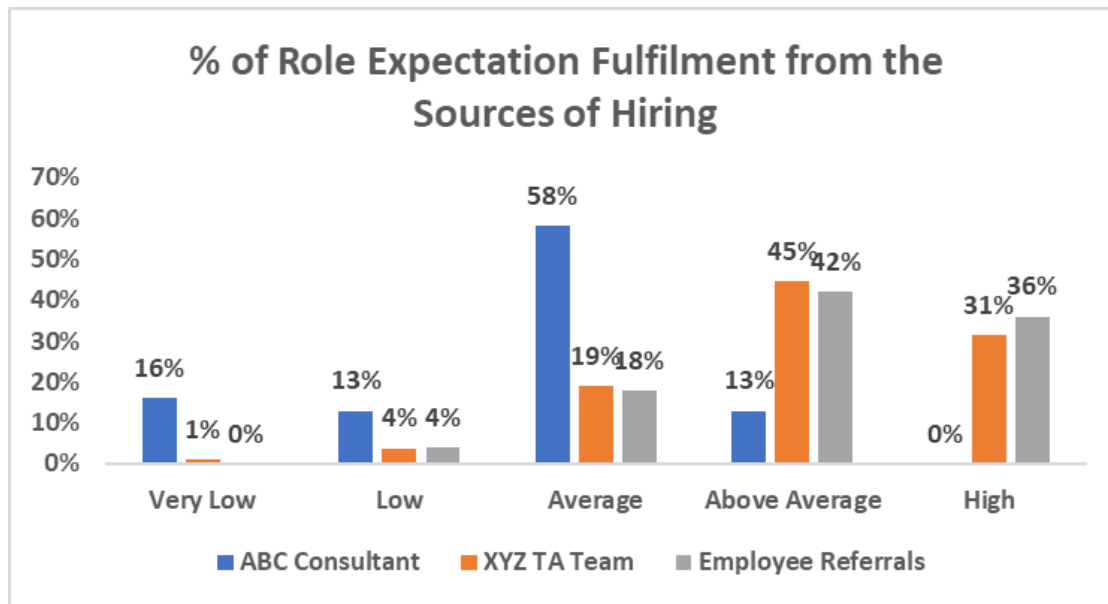

Interpretation : Majority of the position are filled through Employee Referral (Entry level position) and Job Portal (Mid level position) The organization is aiming to increase the female ratio to 50% in the current scenario 30% of new hire are females , more position should be identified within the departments ,launch of social campaign to attract more women candidates , return ship programs for women on career break, higher referral bonus.

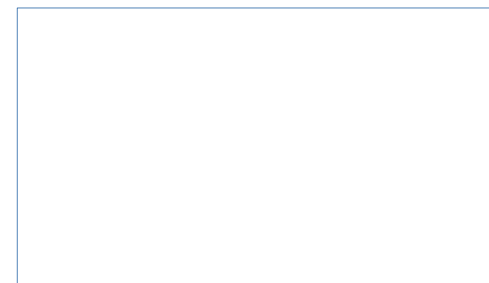

Average Time to Fill : Department Wise

Data Analysis

The highest percentage (36%) of role expectations were fulfilled at a high level in Employee Referrals. XYZ TA Team has met most above-average level expectations (45%) along with 31% of high-level role expectations.

Thank You
