Human Resource Analytics

Lecture 38

Employee Development Analytics - 1

Dr. Abhishek Singh

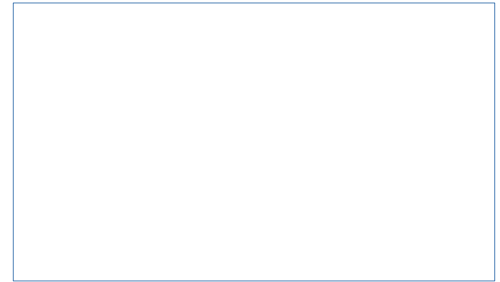

Faculty-Human Resource Management

XLRI-Jamshedpur

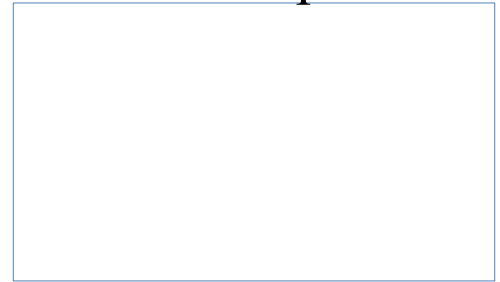

Content

- Important managerial questions
- Employee error matrices

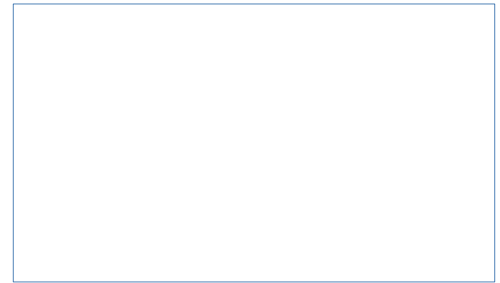

Important managerial questions

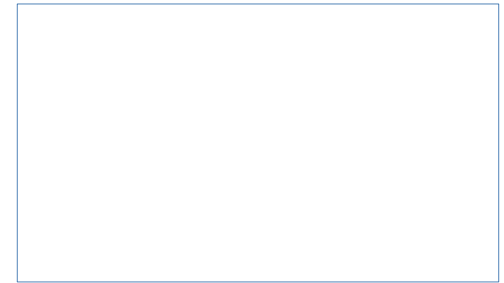

- How L & D department should make the developmental plan for each employee
- How the impact of L & D activities should be measured
- For how many hours employees should be engaged in developmental activities
- For whom developmental activities should be planned
- How to align developmental activity with employees' need at workplace
- Who is the effective coach?
- Who is the effective mentor?

Action errors – Non-attainment of defined goals and nonconformity to some plan

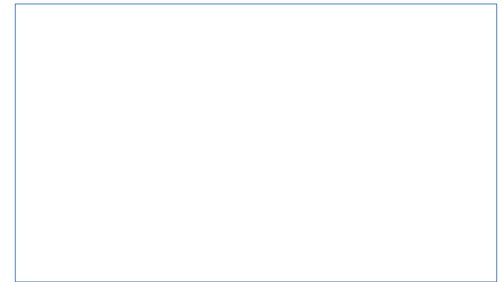

Action error cycle in organization

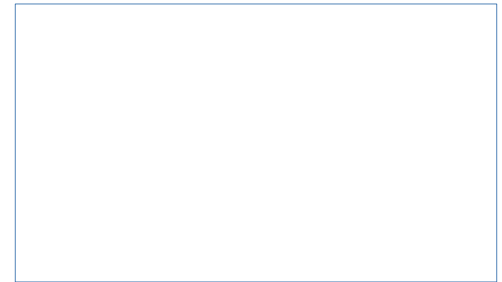

Matrix – 1

Error detection	During the action	Before the action	After the action

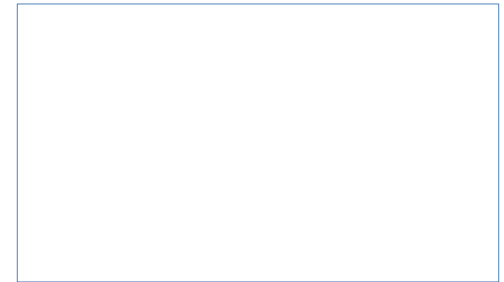

Matrix – 2

Error detection	Internal vs. External

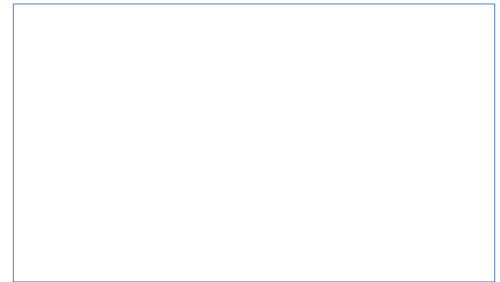

Matrix – 3

Sources of Errors	High confidence errors	Low confidence errors
Self generated errors (Individual)		
Collective errors (Teams)		
Organizational errors (Organization)		

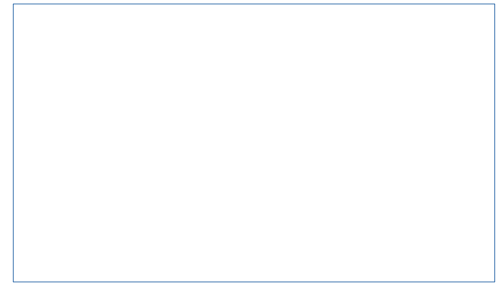

Matrix – 4

Situations	High stake situations	Low stake situations

Outcome

- Self efficacy
- Feedback mechanism
- After action review mechanism
- Development of culture
- Customized developmental plan
- Training on emotion management

Thank You
